REAL PROCUREMENT REVIEW

POWER QUALITY RUSSIA · 6–35 KV

Full Power Quality corpus: 123 unique procurement lots and 112 procedure IDs. Market overview, economics, participants, and a source-linked dossier for every lot.

2023–2026 / As of 2026-11-02

EVIDENCE

Evidence confirms demand at 6, 10 and 35 kV

Expanded original ten-slide overview: every lot now has its own dossier. A research corpus is not a registry of executed contracts.

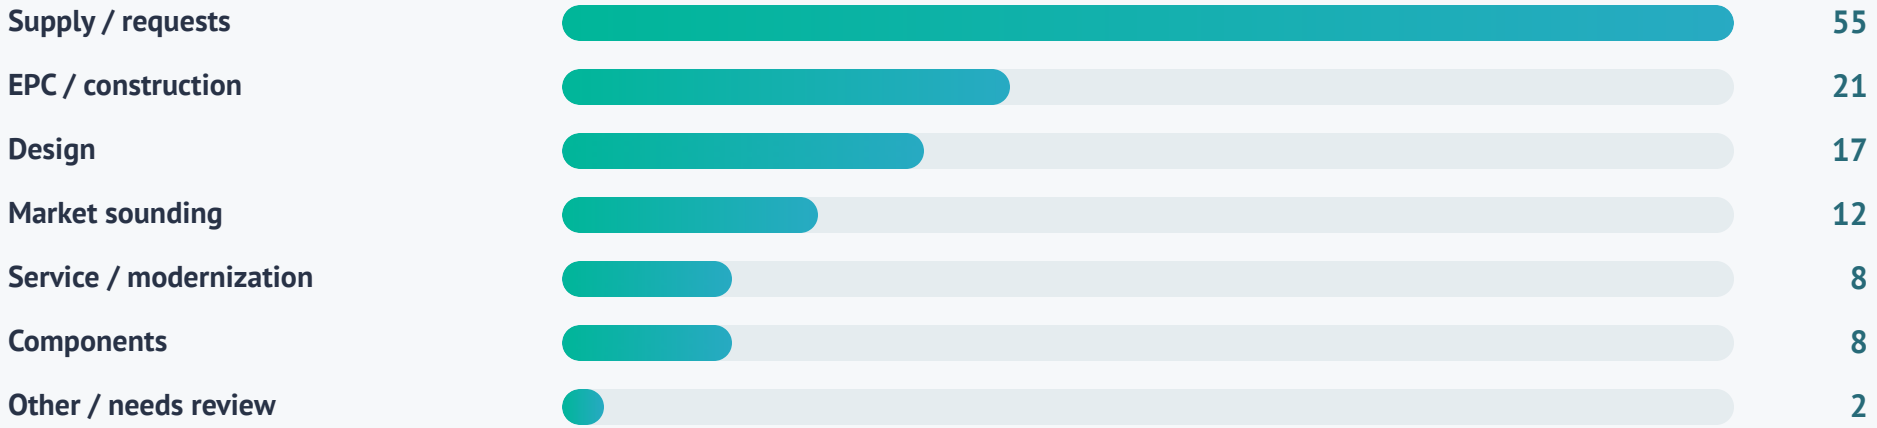

123	112	46	45
Unique lots	Procedure IDs	EIS 223-FZ lots	EIS notices

Important boundary: RFQs, service, engineering and EPC count as research cases, not completed PQ hardware sales. Initial prices, bids and contract values are not additive market revenue.

STRUCTURE

Structure of the research corpus

Grouping by procurement subject, not by signed contracts.

TECHNOLOGY

Technologies found in procurements

Equipment categories are extracted from cards and technical documents; category presence does not mean FGI product approval.

BUYERS

Buyer landscape and discovery timeline

Years reflect publication dates in the corpus, not nationwide market growth.

Year	Lots
2023	4
2024	17
2025	30
2026	67
н/д	5

Organization name in source cards	Lots
ПАО «НК «Роснефть» (корпоративный организатор)	10
ООО «Башкирские распределительные электрические…	5
ПАО «Федеральная сетевая компания — Россети»	3
ПАО «Россети Северо-Запад»	3
ПАО «Гайский горно-обогатительный комбинат»	3
АО «Михайловский ГОК им. А. В. Варичева»	3
ООО «ЛУКОЙЛ-Западная Сибирь»	3

EVIDENCE

Evidence completeness

Field coverage across 123 cases; an empty field means unverified, not zero.

SOURCE LINKS
115 / 123
Public URLs attached

FIRST-PARTY SOURCES
71
Direct evidence tier

NMC / CEILING
49
Not signed contract prices

CONTRACT-PRICE ENTRIES
27
Includes mixed and secondary signals

A named bid participant or supplier is present in 8 cases; this is not a signed-supplier census. All 123 cases remain under research review.

CONTRACTS

Reported and registered contract prices

Only recorded price signals are shown; do not treat total EPC amounts as PQ device revenue.

Case / lot	Customer	Reported price	Signatory
index:vsempodryad:9d4a58cf-6c10-4485-8537-…	ПАО «Федеральная сетевая компания –…	RUB 1,571.46m	Unverified
223fz:32515218366:lot1	АО «Россети Научно-технический центр»	RUB 49.90m	Unverified
223fz:32615684088:lot1	ПАО «Россети Центр»	RUB 37.82m	Unverified
223fz:judicial-contract-03-34-24:lot1	АО «Тюменьэнерго Инжиниринг»	RUB 21.31m	Unverified
223fz:32515225588:lot1	ПАО «Федеральная сетевая компания —…	RUB 20.44m	Unverified

The corpus includes design, service, reconstruction and supply amounts. A reported contract price does not prove payment or the rated voltage of PQ equipment.

ENGINEERING

Technical demand at 6–35 kV

Technically significant cases; amounts may include EPC, design and auxiliary works.

Facility	Buyer	NMC / ceiling	Next action
10 kV / 30 Mvar modular source + 110 kV bank	ПАО «Россети Сибирь», филиал...	RUB 452.02m	Check source spec
Vyartsilya: 10 kV / 3 Mvar	ПАО «Россети Северо-Запад»	RUB 79.10m	Check source spec
Kyappeselga: 35 kV / ≥3.5 Mvar	ПАО «Россети Северо-Запад»	RUB 56.33m	Check source spec
YUTEK: 10 kV / 150 kvar	АО «ЮТЭК-Региональные сети»	RUB 3.42m	Check source spec
Nagornaya: 6.3 kV / 200 kvar	ООО «Башкирские распределительные...	RUB 1.43m	Check source spec
Thyristor reactor and filters, Meleuz	ООО «Водоканал», г. Мелеуз	RUB 3.90m	Spec & contract verified

INDUSTRIAL DEMAND

Industrial procurement demand

One legal procedure may include several physical devices. Demand and signed delivery are different evidence levels.

Customer	Subject	Source status
АО «УК «Кузбассразрезуголь»	6.3 kV STATCOM	source_reports_closed
СИБСТЕКЛО	6 kV UKRM installation	source_reports_closed
ООО «ТН-Энергосбыт»	Capacitor units, rated voltage unverified	archived_outcome_hidden_by_organizer
АО «Тюменьэнерго Инжиниринг»	10.5 kV / 13 Mvar supplied UKRM	source_reports_closed

Installation of a 6 kV UKRM and purchase of capacitor components do not establish a signed delivery of new STATCOM units.

PARTICIPANTS

Participants and documented roles

Commission bidder, EPC contractor, signed supplier and OEM are not interchangeable roles.

Procurement	Named entity	Evidence
223fz:32413195287:lot1	АО «ТЯЖПРОМСЕРВИС»	Named in source; signatory to verify
223fz:32514720691:lot1	ООО «ТД «УК Конденсатор»	Named in source; signatory to verify
223fz:32514947144:lot1	ООО «ТОРГОВЫЙ ДОМ «УСТЬ-КАМЕНОГОРСКИЙ КОНДЕНСАТОР»	Named in source; signatory to verify
223fz:32515582393:lot1	ООО «УК КОНДЕНСАТОР»	Named in source; signatory to verify
223fz:32615966040:lot1	ООО "ЭНЕРГОСЕТЬ"	Named in source; signatory to verify
223fz:32616181358:lot1	ООО «ЭКСПЕРТ ГРУПП»	Named in source; signatory to verify
223fz:32616266007:lot1	ООО «УСТЬ-КАМЕНОГОРСКИЙ КОНДЕНСАТОР»	Named in source; signatory to verify
223fz:judicial-contract-03-34-24:lot1	{'inn': '1644023432', 'name': 'НАО «Электрощит»',...	Named in source; signatory to verify

For most rows the signatory is not established. Supplier rankings require tax IDs, protocols, contracts and

FGI EQUIPMENT

FGI voltage class ≠ tender compliance

Potential entry points exist, but engineering compliance requires case-by-case review.

Voltage	Technology	Compliance condition
6–6,6 кВ	UKRM / capacitor banks	SVG and switched banks are not automatic equivalents
10 кВ	SVG / STATCOM	Verify harmonics, SCADA, climate and admissibility
33–35 кВ	High-voltage systems	Validate models against original specifications
400/690 В	FGAPF	Not a stand-alone 6–35 kV filter

SOURCES / LIMITS

Sources, definitions and limitations

Every procurement record follows as its own slide: this is the underlying evidence, not merely ten selected examples.

One lot
A canonical legal procurement lot; several physical devices within one lot do not become several lots.

Price types
NMC ≠ bid ≠ registered contract ≠ payment. EPC and design budgets are not hardware-only value.

Suppliers
A bidder named in a protocol cannot automatically be named a signed supplier or manufacturer.

Sources
Original source URLs appear where stored in the database. Unverified fields are explicitly labeled.

FIELD COVERAGE

Field verification progress

Populated fields do not imply first-party verification. Frozen current-corpus field coverage.

Field	Populated (of 123)
Initial ceiling	49
Equipment rated voltage	35
Rated reactive power	13
Commission bid amount	17
Reported contract price	27
Equipment-only price	4
Equipment OEM	0

Source evidence grades: A=48 · B=7 · C=60 · D=8. Individual missing fields and the next research step appear on every second case page.

RESEARCH CAVEAT / SOURCE NOTE Процедура конкурентных предложений НЕ состоялась из-за одной заявки, но агрегатор указывает позднейший договор. Нельзя считать сумму EPC работ отдельной продажей батарей, а ненайденного поставщика нельзя назвать победителем подписанного договора. One-bid competitive procedure failed, but a subsequent signed contract is secondary-reported. Never equate competition failure to zero procurement; winner/contractor's identity remains unverified.

ПАО «Россети Сибирь»

Reactive-power compensation | Design | 2025-07-16 | STATUS: Contract reported by source

ORIGINAL RUSSIAN PROCUREMENT SUBJECT

ПИР, корректировка ПД/РД для ПС Тяжинская с заменой БСК-110 на СКРМ 52 Мвар

NMC / CEILING	BID / PROTOCOL	REPORTED CONTRACT PRICE*
RUB 3,031,988.00	—	—

TECHNICAL PARAMETERS

Quantity: 1 проектная работа

BIDDER / SUPPLIER NAMED IN SOURCE

Not stated / verification pending

RESEARCH CAVEAT / SOURCE NOTE Цена за проектирование, а не поставку СКРМ. БСК-110 явно исходный объект замены, но напряжение вновь проектируемого СКРМ из карточки неизвестно. Эта процедура, более поздний конкурс 2026 и апрельское сообщение 2026 относятся к той же потребности, не трём продажам. Cross-check original tender №32616435269 technical documents: supply MPU 10kV and BSK110 for Tyazhinskaya, 110kV complete system, 52Mvar capacitive. Link as downstream supply project, not same signed contract as 2025 РИР.

Capacitor banks | Components | 2026-08-05 | STATUS: Contract reported by source

ORIGINAL RUSSIAN PROCUREMENT SUBJECT

Поставка пяти конденсаторов БСК в аварийный запас для ПС 500 кВ «Калужская». ТЗ: QBANK-A типа CHDB-142 или эквивалент, номинал конденсатора 8,3 кВ, 592 квар. Закупка признана несостоявшейся из-за одной допущенной заявки; комиссия рекомендовала заключить договор с указанным участником; впоследствии договор №1605245 зарегистрирован; поставщик-подписант и оплата не установлены.

Voltage: 6.3 kV · Power: 3000 кВАр (по опросному листу; не умножать на 2) · Quantity: 2 шт

BIDDER / SUPPLIER NAMED IN SOURCE

Not stated / verification pending

RESEARCH CAVEAT / SOURCE NOTE Bidzaar №351-062: получены SHA-проверенные оригиналы DOC и DOCX. Опросный лист указывает УКРМ 6,3 кВ, 3000 кВАр; заявлено 2 установки, но суммарная мощность двух изделий отдельно не подтверждена. Это анализ цен/мониторинг рынка, а не доказанный подписанный договор. Победитель, цена договора, факт поставки и оплаты не установлены.

АО «Ванинотрансуголь» (АО «ВТУ»)

capacitor bank component | Supply / requests | 2026-10-16 | STATUS: No bids

ORIGINAL RUSSIAN PROCUREMENT SUBJECT

Закупка одного конденсатора КЭП3-10,5-150-3У2 номинальным напряжением 10,5 кВ и паспортной мощностью 150 квар. B2B-Center 4643332, организатор ООО УК Колмар, заказчик АО ВТУ. Процедура признана несостоявшейся 22.10.2026, подано ноль заявок; договор и поставщик отсутствуют по этой процедуре.

NMC / CEILING	BID / PROTOCOL	REPORTED CONTRACT PRICE*
–	–	–

TECHNICAL PARAMETERS

Voltage: 10.5 kV · Power: 150 кВАр (номинал модели; закупка не состоялась) · Quantity: 1 шт

BIDDER / SUPPLIER NAMED IN SOURCE

Not stated / verification pending

RESEARCH CAVEAT / SOURCE NOTE First-party original B2B page explicitly distinguishes organiser ООО УК Колмар from ordering customer АО ВТУ. Secondary Energybase lists only organiser as buyer; do not confuse. 2026-10-22 actual original outcome says 0 applications and failed; no signed price, confirmed delivery, manufacturing facility or successful supplier. Model КЭП3-10,5-150-3У2 is a single medium-voltage capacitor, NOT 150 Mvar and NOT a complete STATCOM.

Capacitor banks | Supply / requests | 2024-06-24 | STATUS: Contract reported by source

ORIGINAL RUSSIAN PROCUREMENT SUBJECT

Поставка батарей статических конденсаторов БСК, 7 шт. для «Волгоградэнерго»

NMC / CEILING	BID / PROTOCOL	REPORTED CONTRACT PRICE*
RUB 10,880,835.00	—	RUB 10,880,835.00

TECHNICAL PARAMETERS

Quantity: 7 шт

BIDDER / SUPPLIER NAMED IN SOURCE

Not stated / verification pending

RESEARCH CAVEAT / SOURCE NOTE Реальный ЕИС номер скрыт (только фрагмент ▒413734▒▒); НЕЛЬЗЯ выдавать внутренний UUID индекса за официальное ЕИС. Есть сообщение о договоре 10880835, оригинальная регистрация/исполнитель и номинал БСК не подтверждены. Возможное совпадение с иной закупкой нельзя оценить без ЕИС номера; 7 БСК не равно 7 signed contracts.
