Arvectum

arvectum.com · Tender Agent / Data Platform

MARKET INTELLIGENCE · 6–35 KV

# POWER QUALITY RUSSIA · 2023–2026

Complete auditable snapshot: 123 unique procurement lots. Market analytics and a dedicated three-page dossier per case.

**As of 4 November 2026 · ARVECTUM**

## EXECUTIVE

# Demand found; completed supply revenue unverified

A corpus of legal lots, market soundings, EPC, design and services—not 123 executed contracts.

6–35 kV · PQ Не установлено

| LOTS | PROCEDURE IDS | EIS NOTICES | CONTRACT FLAG |
|---|---|---|---|
| 123 | 112 | 45 | 20 |
| | | | Signatory unverified |

**Finding:** UKRM, capacitor banks, STATCOM, SVC and filtering appear, but equipment-only costs, signatories, OEMs and payment remain sparsely evidenced.

METHOD

# A lot, a procedure, a contract and a device differ

Counting rules for commercial integrity.

6–35 kV · PQ Не установлено

### Legal lot

**123**

Canonical notice:lot key, not a contract or installed device.

### Procedure IDs

**112**

One procedure can contain multiple lots.

### Coverage exclusions

No guarantee of exhaustive EIS or commercial platform coverage; one facility may have multiple overlapping procedures.

### Evidence meaning

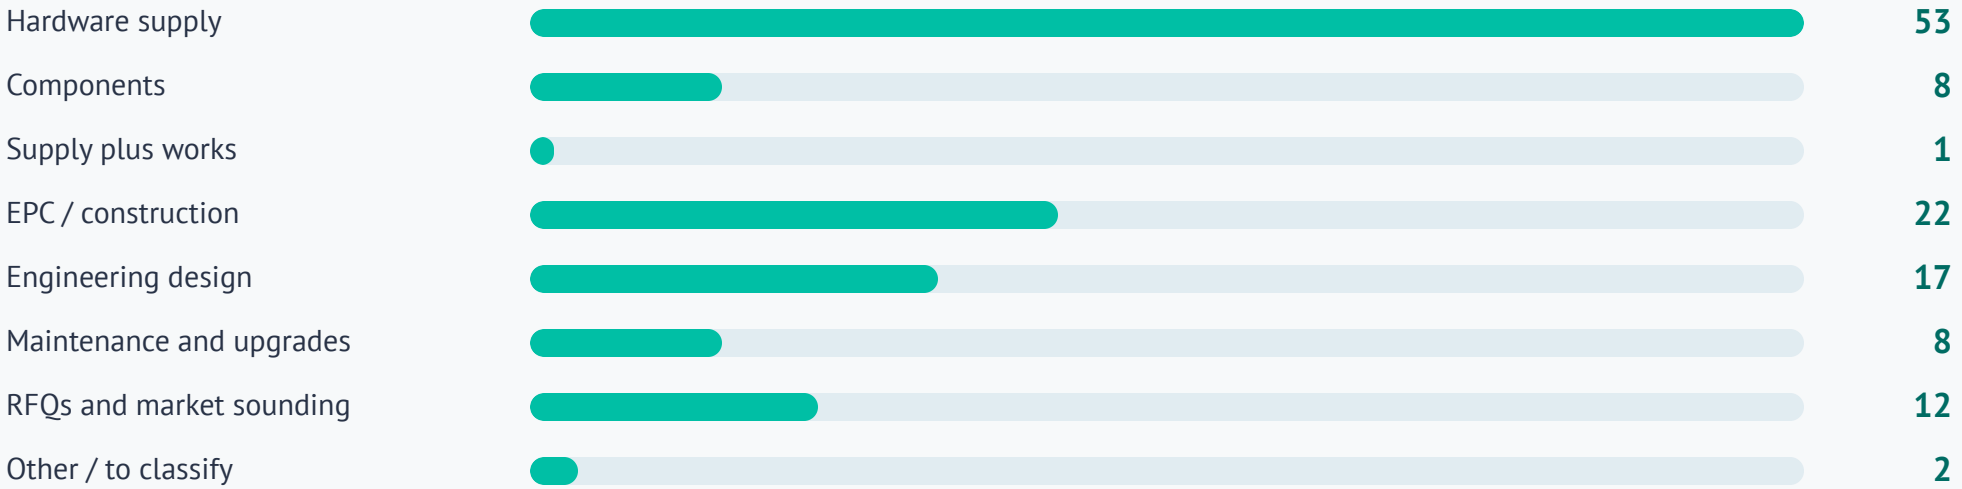

An original or SHA proves only its stated facts. Protocol ≠ contract ≠ acceptance ≠ payment.

SCOPE

6–35 kV · PQ Не установлено

# Procurement scopes

Exclusive counting categories; individual EPC packages can contain multiple PQ technologies.

A supply request or market sounding is not a completed purchase.

## TECHNOLOGIES

# Technology families

Derived from lot descriptions; a technology name does not prove FGI substitution compliance.

**6–35 kV · PQ** Не установлено

YEARS

6–35 kV · PQ Не установлено

# Discovery by year, not market growth

Publication dates in available records; coverage is not exhaustive for market-wide growth analysis.

**No extrapolation:** 2026 dominates partly because of collection depth and source access, not verified nationwide demand growth.

## CHANNELS

6–35 kV · PQ Не установлено

# 223-FZ notices and commercial channels

Legal status and documentary evidence vary by platform.

| 223-FZ LOTS | 223-FZ NOTICES | OTHER CARDS | WITH SOURCE URL |
|---|---|---|---|
| 46 | 45 | 77 | 123 |

| Channel | Lots | Evidence scope |
|---|---|---|
| Original EIS 223-FZ ID | 46 | Notice; contract needs independent evidence |
| Other platforms / indexes | 77 | Can include price enquiries or adjacent stages |

Third-party index pages cannot establish an official executed contract.

BUYERS

6–35 kV · PQ Не установлено

# Top recurring buyers / organizers

Grouped by tax ID where available, otherwise by exact name; overlaps are possible.

| Organization / source label | Lots |
|---|---|
| ПАО «Россети» / МЭС Юга | 13 |
| ПАО «НК «Роснефть» (корпоративный организатор) | 10 |
| ООО «Башкирэнерго» | 8 |
| ПАО «Россети Сибирь» | 5 |
| АО «Россети Научно-технический центр» | 4 |
| ПАО «Россети Северо-Запад» | 3 |
| ПАО «Гайский горно-обогатительный комбинат» | 3 |
| АО «Михайловский ГОК им. А. В. Варичева» | 3 |
| ООО «ЛУКОЙЛ-Западная Сибирь» | 3 |

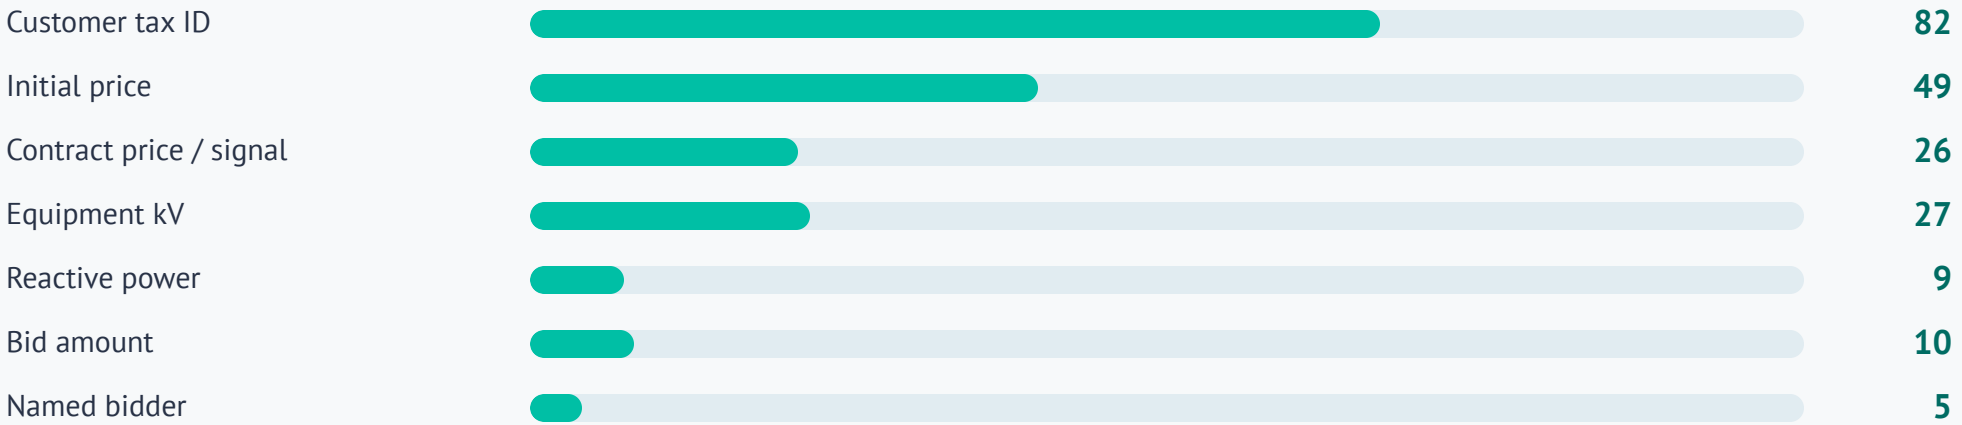

Tax ID populated for 82 of 123 rows. An organizer is not necessarily the final beneficiary.

## DATA COVERAGE

# Critical fields are sparsely populated

Populated does not mean each number was independently verified.

**6–35 kV · PQ** Не установлено

Missing fields do not mean a winner, signed contract or payment does not exist; they require further evidence.

## CONTRACTS

# Contract evidence is not supplier identity

Only stored record fields are counted; cash payment and execution are not established.

6–35 kV · PQ Не установлено

| CONTRACT REGISTRY FLAG | CONTRACT ID PRESENT | SIGNED SUPPLIER PROVEN | PAYMENT PROVEN |
|---|---|---|---|
| 20 | 23 | 0 | 0 |

**Qualification:** 20 cards carry registered-contract flags; they do not establish the signatory, equipment-only value or performance. A commission winner is a distinct role.

FINANCIAL FIELDS

# Five distinct financial categories

Adding all listed prices creates false market turnover, especially when EPC and design are mixed in.

6–35 kV · PQ Не установлено

| NMC POPULATED | BID AMOUNT | CONTRACT PRICE FIELD | EQUIPMENT-ONLY FIELD |
|---|---|---|---|
| 49 | 10 | 26 | 4 |

| Metric | How to interpret |
|---|---|
| NMC | Budget ceiling; not a payment |
| Bid | Bid/protocol; not delivered goods |
| Contract | Check scope, parties and terms |
| PQ hardware | Hardware-only price where supported |
| Payment | Requires payment and acceptance evidence |

## TOP NMC

# Largest budgets are not device-only sales

Ceilings of mixed-scope tenders, NOT OEM sales revenue.

**6–35 kV · PQ** Не установлено

| Buyer / facility | Scope | NMC |
|---|---|---|
| ПАО «Федеральная сетевая компания – Россети» | EPC / construction | RUB 1,571.46m |
| ПАО «Федеральная сетевая компания – Россети» | EPC / construction | RUB 1,518.15m |
| ПАО «Россети» / МЭС Сибири | EPC / construction | RUB 826.22m |
| ПАО «Россети Сибирь», Кузбассэнерго-РЭС | Hardware supply | RUB 452.02m |
| ПАО «Россети Сибирь», филиал «Кузбассэнерго-РЭС» | Hardware supply | RUB 452.02m |
| АО «Россети Научно-технический центр» | Other / to classify | RUB 399.12m |
| ПАО «Россети Северо-Запад» | EPC / construction | RUB 79.10m |

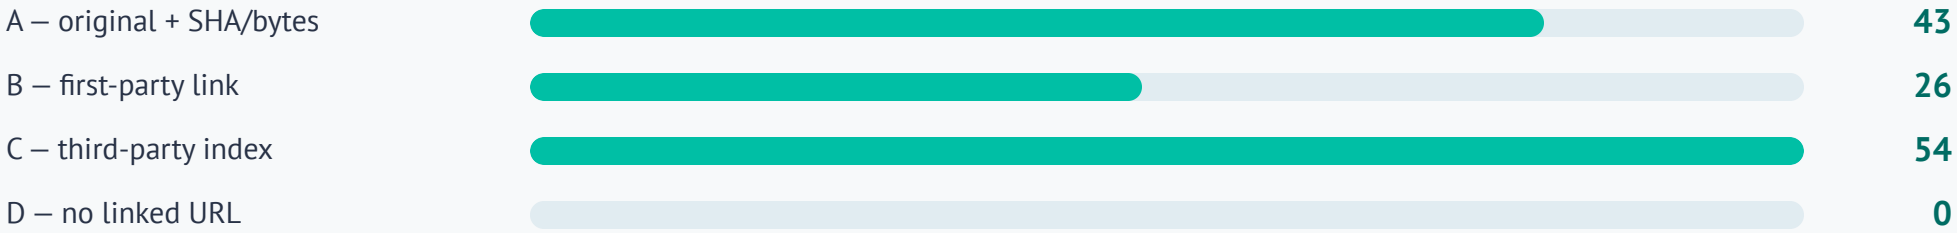

Khani and Lopcha are 220 kV network EPC packages, not solely 6–35 kV PQ hardware; direct price comparison is invalid.

## SOURCE GRADES

6–35 kV · PQ Не установлено

# Source provenance by lot

A tier describes available lot-level provenance, not verification of every attribute.

**Priority:** obtain original specifications and protocols for the 54 C-grade records, then verify bidders, signed contracts, OEMs and performance. A-grade cases still need field-specific scrutiny.

## SUPPLY PIPELINE

# Hardware supply signals and ceilings

Per-lot amounts; contract signature and execution require independent evidence.

**6–35 kV · PQ** Не установлено

| Lot / buyer | Equipment subject | NMC / ceiling |
|---|---|---|
| ПАО «Россети Сибирь», Кузбассэнерго-РЭС | Конкурс №26-1149: поставка батарей статических конденсаторов, Кузбассэнерго-РЭС | RUB 452.02m |
| ПАО «Россети Сибирь», филиал… | Поставка батарей статических конденсаторов для Кузбассэнерго-РЭС. Открытые… | RUB 452.02m |
| АО «Россети Научно-технический центр» | Смешанная поставка сырья, материалов и комплектующих для изготовления КВУ,… | RUB 49.90m |
| ООО «Башкирские распределительные… | Поставка двух комплектов УКРМ для ПО НЭС Башкирэнерго, 25-004033; прямой… | RUB 27.32m |
| ПАО «Россети Юг», филиал… | Поставка батарей статических конденсаторов БСК, 7 шт. для «Волгоградэнерго» | RUB 10.88m |
| ПАО «Россети» / МЭС Юга | 24 отдельных конденсатора батарей статических конденсаторов для существующего… | RUB 6.81m |
| ООО «Башкирэнерго» | Поставка конденсаторной установки УКРМ для ПО НЭС, заявка 26-003065. | RUB 5.88m |

Commercial requests and cancelled tenders are not revenue; similar lots can be different stages of one project.

## EPC

6–35 kV · PQ Не установлено

# PQ subsystems embedded in EPC packages

Large figures include design, construction, equipment and commissioning.

| Tender | Facility / scope | NMC |
|---|---|---|
| index:vsempodryad… | Лот 1 — ПС 220 кВ Лопча, РД/СМР/ПНР/МТРиО; инвестиционный проект СКРМ 154 Мвар Лопча и… | RUB 1,571.46m |
| 32413581034 | Лот 2 — ПС 220 кВ Хани, РД/СМР/ПНР/МТРиО по инвестпроекту СКРМ 128 Мвар Хани и 154 Мвар… | RUB 1,518.15m |
| 32413708738 | ВЛ 220 кВ Шушенская–Туран, ПС 220 кВ Туран с УШР 40 Мвар и БСК 110 Мвар | RUB 826.22m |
| 32616497692 | ПС 110 кВ Вяртсиля (ПС 28), УКРМ 10кВ 3 Мвар; ПС 35 кВ Октябрь (ПС 12С), Карелия | RUB 79.10m |
| 32616430382 | Реконструкция ПС 220 кВ «Полупроводники»: замена компенсирующих устройств в ЗРУ 10 кВ,… | RUB 72.18m |
| 32515208744 | Реконструкция ВЛ Лопча—Юктали/Антрацит и смежных подстанций (СКРМ 128/154 Мвар — смежные… | RUB 56.69m |

None of these totals is treated as a single device price without an equipment-only bill.

BIDDERS

# Named commission bidders ≠ contract signatories

Only actually recorded names are listed; a missing name is an evidence gap.

6–35 kV · PQ Не установлено

| Procedure | Named bidder | Offer |
|---|---|---|
| 32413195287 | АО «ТЯЖПРОМСЕРВИС» | Not established |
| 32514720691 | ООО «ТД «УК Конденсатор» | Not established |
| 32514947144 | ООО «ТОРГОВЫЙ ДОМ «УСТЬ-КАМЕНОГОРСКИЙ КОНДЕНСАТОР» | RUB 3.16m |
| 32616181358 | ООО «ЭКСПЕРТ ГРУПП» | RUB 3.05m |
| 32616266007 | ООО «УСТЬ-КАМЕНОГОРСКИЙ КОНДЕНСАТОР» | RUB 662,460.00 |

**Separate roles:** EXPERT GROUP is proven as the RETO commission winner in protocol 186-2; the signed contracting supplier and OEM remain unverified.

VOLTAGE

# Technical fit requires equipment-rated voltage

A 110/220 kV substation rating is NOT the rated voltage of an embedded compensation device.

6–35 kV · PQ Не установлено

| RATED KV POPULATED | RATED KV MISSING | RATED KVAR/MVAR KNOWN | QUANTITY PRESENT |
|---|---|---|---|
| 27 | 96 | 9 | 53 |

### Validation items

Rated kV, kvar/Mvar, steps/reactors, harmonics, climate, SCADA, type tests and substitution rules.

### No automatic substitution

IGBT SVG, switched UKRM and thyristor SVC address related functions but are not automatically interchangeable.

COMMERCIAL ROLES

# Supply-chain roles require more evidence

Separate procurement organizers, buyers, EPCs, designers, bidders, suppliers and OEMs.

6–35 kV · PQ Не установлено

| BUYER TAX IDS | NAMED BIDDERS | PROVEN SIGNATORIES | PROVEN OEMS |
|---|---|---|---|
| 82 | 5 | 0 | 0 |

**Gap:** supplier rankings or OEM attribution require signed-contract counterparties and original product documents; protocol names alone are insufficient.

## REPORTED CONTRACTS

6–35 kV · PQ Не установлено

# Reported contract prices need scope scrutiny

Registry or secondary price fields do not establish payment, delivery or the manufacturer.

| Case | Scope | Reported price |
|---|---|---|
| index:vsempodryad:9d4a58cf-6c10-4485-8537-… | EPC / construction | RUB 1,571.46m |
| 223fz:32515218366:lot1 | Hardware supply | RUB 49.90m |
| 223fz:32615684088:lot1 | EPC / construction | RUB 37.82m |
| 223fz:32515225588:lot1 | Engineering design | RUB 20.44m |
| 223fz:32616120582:lot1 | EPC / construction | RUB 17.00m |
| 223fz:32514720691:lot1 | Hardware supply | RUB 14.79m |
| index:vsempodryad:ea5a381b-31b1-4c37-962f-… | Hardware supply | RUB 10.88m |

Mixed EPC contract values must not be treated as PQ-equipment-only prices.

FGI / CHANNEL

# FGI go-to-market opportunities

Demand segmentation for due diligence, not evidence of FGI sales.

6–35 kV · PQ Не установлено

## Direct supply

Check exact UKRM/bank specifications, kV/Mvar, permissible equivalents, delivery and approval requirements.

## Designers and EPCs

Design/EPC stages enable early SVG/STATCOM positioning; supply engineering studies and compliant design inputs.

## Components

Capacitor, reactor or filter components are not proof of a completed power-electronics solution sale.

## Qualification

Validate Rosseti accreditation, standards, climatic class, protection and telemetry interfaces.

RESEARCH BACKLOG

6–35 kV · PQ Не установлено

# Evidence-enrichment workflow P0–P5

Unknown means a research task, not proof the event never occurred.

| Step | Required evidence | Done when |
|---|---|---|
| P0 | Canonical identity | Unique notice:lot |
| P1 | Notice + buyer/tax ID | URL + original file |
| P2 | Rated equipment spec | Exact original specification |
| P3 | Bids and winner | Dated commission document |
| P4 | Signed contract and item prices | Signatory and BOM |
| P5 | OEM, delivery, payment | Acceptance and payment proof |

Highest-risk records are 54 source-grade-C entries and missing prices/technical parameters.

LIMITATIONS

# How to use the report without overclaiming

Every lot receives three pages: case overview, technical/financial data and participants/sources.

6–35 kV · PQ Не установлено

### Documented now

Buyers, descriptions, selected originals/protocols, some prices and equipment specifications.

### Not established yet

Exhaustive market, most signatories/OEMs, actual payment, equipment-only pricing within EPC.

### Technical quantities

Rated kV must explicitly refer to the device; substation ratings are not substituted.

### Provenance and date

Links reflect frozen records as of 4 Nov 2026; inaccessible originals and historical archives are distinct.

## BID PROTOCOL

223fz:32413708738:lot1

# Original protocol: bidders, offers and decision

Bid prices and rejected offers are not completed contract sales.

| Bidder | TIN | Offer / source field | Role or decision |
|---|---|---|---|
| ООО «ЛЭМ» | — | initial_offer_ex_vat_rub: 688519128.87; initial_offer_inc_vat20_rub: 826222954.64 | rejected |
| ООО «ЭНЕРГЕТИЧЕСКОЕ СТРОИТЕЛЬСТВО» | — | initial_offer_ex_vat_rub: 688519316.67; initial_offer_inc_vat20_rub: 826223180.00 | rejected |

**Protocol specifics:** Design/author supervision schedule contradicts project contract timeline; author supervision needed throughout construction but participant begins RD later than site start / Schedule places design and author supervision after construction start, conflicts with original tender contracts
